[Detail Run]

S1: Launch, Login And Navigate To Ababil → **Sanction Limit** Module:

Logon to Ababil application. Once the Ababil home page appears, click on the icon of the “**Sanction Limit**” module. From the dropdown of the Sanction Limit main menu, click on the **Sanction Limit**.

V1: Verify that the **Looking for Limit? Search here** label appears at the top of the page and a **Create** button is available in the UI.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 01]

S2: **Search** sanction.

Provide Customer ID for searching the required sanction.

V2: Verify that the required sanction is appearing at the search list.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 02]

S3: Amend **Sanction**

From the action list, click **Amendment**.

V3: Verify that **Action** button will appear at the action list where **View & Amendment** functions appear properly. Click **Amendment**.

Also verify that displayed UI contains the label "**Amendment Sanction Information**".

Two new mandatory data fields will appear including **Amendment Type & Amendment note**.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 03]

S4: Click **Limit Tree Lookup** with those two mandatory fields blank.

V4: Verify that the mandatory fields will be marked as red as they stay blank.

Take screenshots of the page and save to the designated storage for record keeping. [Screenshot 04]

S5: Click **Limit Tree Lookup** providing the mandatory fields data.

V5: Verify that the node name and the limit amount will appear alongside the **Save Sanction** button.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 05]

S6: Click **Save Sanction**.

V6: Verify that a confirmation popup will appear after the action. Click "Yes" to proceed.

Also verify that a popup will appear as "**Sanction Information amended successfully**".

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 06]

S7: Click **Save Sanction**.

V7: Verify that the task will be sent for verification successfully and a pop up appears as **“Task sent for verification”**.

Save the Task ID.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 07]

S8: Verify and Accept From My Task:

If the task is sent to verify then login as a verified user and verify the required details. Then click on the accept button.

V8: Verify that the success popup message will be displayed **"Verification task done successfully"**.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 08]

S9: Risk and Hazard:

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V9: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

- i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise, consistent, complete and unambiguous.
- ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.
- iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.
- iv) Make sure that the operation steps are easy-to-remember.
- v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.
- vi) Make sure that the AUT does not hang during run time or "strand" the user.
- vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.
- viii) Make sure that the AUT does not overload or confuse the users with information that is

unformatted, densely packed or presented too briefly.

ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.

x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
