Input/Output Dataset Information:

The input/output datasets referenced in this test case are stored, by the test case name, in [Storage Name], under "[Storage Location Path]".

The tools referenced in this test case are stored, by tool classification, in [Storage Name], under "[Storage Location Path]".

[Detail Run]

S1: Launch, Login And Navigate To Ababil → **Sanction Limit** Module:

Logon to Ababil application. Once the Ababil home page appears, click on the icon of the “**Sanction Limit**” module. From the dropdown of the Sanction Limit main menu, click on the **Collateral Security**.

V1: Verify that the **Collateral Information** label appears at the top of the page. A Customer Search lookup is available on the page.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 01]

S2: Select an active customer

V2: Verify that **Customer ID, Customer Name, Customer Type, Customer Status** fields are filled with data after selecting active/inactive customers. **New** button will appear for active customers to tag new collateral. Customer status will be shown as "Active".

Hold the **Customer ID & Customer Name**.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 02]

S3: **Add** Third party collateral with all the mandatory fields blank.

Click "New" button. Check Third party collateral and then uncheck it.

V3: Verify that the **Create Collateral** appears as a label at the top and a checkbox is showing that holds the title **Third party collateral**.

After checking the box, a customer lookup will appear.

Uncheck the third party collateral and put values to each mandatory field.

Also verify that, all the mandatory fields will be marked as red for clicking **Save** by all the mandatory fields blank.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 03]

S4: Select a customer that has no mapped collateral.

Check **Third Party Collateral**.

V4: Verify that a pop up will appear as "**No active and mortgage type collateral found for this customer.**"

Also verify that, **Collaterals** dropdown will remain disable.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 04]

S5: Select a customer that has already mapped collateral (Real Estate Collateral).

V5: Verify that **Collaterals** dropdown will be clickable and the available real estate collateral will appear as a list, select one.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 05]

S6: **Check** Forced sale Value and Market Value balance validation.

Force value can be equal or smaller than market value, but won't exceed the market value.

V6: Verify that a validation text appear if the forced value exceeds market value as a validation text will appear as "**Maximum forced sale value should be equal or less than market value**"

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 07]

S7: **Save** Third Party Collateral with all mandatory fields

V7: Verify that a popup will appear as "**Collateral information created successfully**"

Store all the provided data.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 07]

S8: **View** Collateral

Click on the Action button for the collateral and select **View**.

V9: Verify that the text **Collateral Details** and **INACTIVE** will appear at the top of the UI.

Also verify that all the values are showing successfully as provided in create mode. Moreover, in the Collateral Details section, the same customer id will appear as **Third party customer ID** that is selected from customer lookup. Besides, **Third party collateral** will be marked as checked too.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 09]

Click **Back** to go Collateral Information UI.

S10: **Update** Third party collateral

Click on the Action button for the collateral and select **Edit**.

V10: Verify that the text **Edit Collateral** will appear at the top of the UI.

Also verify that all the values are showing successfully as provided in create mode and proceed.

Ensure that a pop up will appear for updating collateral successfully as "**Collateral information updated successfully**".

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 10]

S11: Risk and Hazard

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V11: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

- i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise, consistent, complete and unambiguous.
- ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.
- iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.
- iv) Make sure that the operation steps are easy-to-remember.
- v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.
- vi) Make sure that the AUT does not hang during run time or "strand" the user.
- vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.
- viii) Make sure that the AUT does not overload or confuse the users with information that is unformatted, densely packed or presented too briefly.
- ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.
- x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
