

Title: ABABIL.INV.01.02 - SEARCHING INV ACCOUNT

Scope: The purpose of this test is to verify that the functionality of searching an investment account of the ABABIL Finance Module is working as per expectation. The test verifies successful account filtering according to field data and failure to do the same without a single mandatory field data.

Test Environment

Name Of The Web Based Application Under Test: ABABIL

Nature Of The Web Based Application Under Test: Core Islamic Banking Software Solutions

Name Of The Web Browser: CHROME (Current Version), MOZILLA FIREFOX (Current Version)

Name Of The OS: Windows 10

Test Procedure and Verification

Explanation of terms:

S<number>: stands for identification of a test procedure step.

V<number>: stands for identification for the corresponding verification(s).

V<number>: N/A stands for verification is not required for this step.

Input/Output Dataset Information:

The input/output datasets referenced in this test case are stored, by the test case name, in [Storage Name], under "[Storage Location Path]".

The tools referenced in this test case are stored, by tool classification, in [Storage Name], under "[Storage Location Path]".

[Detail Run]

S1: Launch, Login And Navigate To Ababil → **Finance** Module:

Logon to Ababil application. Once the Ababil home page appears, click on the icon of the "**Finance**" module, then dropdown the Finance main menu, click on the Investment menu item and then click **Account**.

V1: Verify that the **Account** page appears as per expectation. The "**+ Create Account W/O Limit**" and "**+ Create**" buttons are present on the page. Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 01]

S2: Search **Financing Account** for invalid Data/set:

Click on the “**Search**” button.

V2: Verify that each of the first three input fields including **Account Number, Name & Customer ID** are encountered by wrong data one by one and click **Search**. Verify that there will be a “**no records found**” message appearing instead of appearing any accounts in the table for invalid data based searching.

- i) Invalid “Account Number” [Screenshot 02]
- ii) Invalid “Name” [Screenshot 03]
- iii) Invalid “Customer ID” [Screenshot 04]

S3: Search **Financing Account** with valid data:

Search an account by providing valid data in each field.

V3: Verify that accounts are appearing according to search criteria.

- i) Account Number [Screenshot 05]
- ii) Name [Screenshot 06]
- iii) Customer ID [Screenshot 07]
- vi) Branch [Screenshot 08]
- v) Status [Screenshot 09]
- vi) Product [Screenshot 10]
- vii) Currency [Screenshot 11]
- viii) Classification Status [Screenshot 12]

S4: Risk and Hazard:

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V4: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

- i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise,

consistent, complete and unambiguous.

ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.

iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.

iv) Make sure that the operation steps are easy-to-remember.

v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.

vi) Make sure that the AUT does not hang during run time or "strand" the user.

vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.

viii) Make sure that the AUT does not overload or confuse the users with information that is unformatted, densely packed or presented too briefly.

ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.

x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
