**V<number>:** N/A stands for verification is not required for this step.

**Input/Output Dataset Information:**

The input/output datasets referenced in this test case are stored, by the test case name, in [Storage Name], under "[Storage Location Path]".

The tools referenced in this test case are stored, by tool classification, in [Storage Name], under "[Storage Location Path]".

[ Detail Run ]

S1: Edit Account Page:

Click on the Edit button to navigate the “Financing Account Update” page.

V1: Verify that a new page appears as per expectation with the “**Financing Account Update**” title on the top of the page. Take a screenshot of the page and save to the designated storage for record keeping.

Also verify that a pop up will appear for providing different branch customer.[Screenshot 01]

S2: Save With All Data Fields On “Financing Account Update” form Blank:

V2: Verify that the save process is unsuccessful and the mandatory fields are marked as red indicating that these are required data fields. Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 02]

S3: Save With Any Single Mandatory Field Blank:

Leave each of the mandatory fields blank one by one while inputting all other mandatory field data and then click on the Save button each time. After clicking the Save button for each case, perform the following verifications for each one respectively as stated.

V3: Verify that the save process is unsuccessful and the label of the mandatory field with missing data appears as red for each of the following fields respectively. Take a screenshot of the page for each of the respective scenarios and save to the designated storage for record keeping.

- i) Blank "Account Title". [Screenshot 03]
- ii) Blank "Opening Date". [Screenshot 04]
- iii) Blank "Investment amount". [Screenshot 05]
- iv) Blank "Economic Code". [Screenshot 06]
- v) Blank "Loan categories of financing". [Screenshot 07]

S4: Save Only With All Mandatory Field Data:

Input valid data in all the mandatory fields for updating the financing account and then click on the Save button.

V4: A pop up appears and to proceed to save, select “Yes”.

Verify that the save process is successful and a popup message "Financing account updated successfully" is displayed. Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 08]

S6: Click **Save** to update.

V6: Verify that a confirmation pop up will appear as **"Task sent for verification"**.

Take a screenshot of the pages and save to the designated storage for record keeping. [Screenshot 09]

**Save** the Task ID.

S7: Verify and Accept From My Task:

If the account creation is sent to verify then login as a verified user and verify the required details. Then click on the accept button.

V7: Verify that the success popup message will be displayed **"Verification task done successfully"**.

Matches the A/C number.

Take a screenshot of the pages and save to the designated storage for record keeping. [Screenshot 10]

S8: Risk and Hazard:

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V8: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

- i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise, consistent, complete and unambiguous.
- ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.
- iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.
- iv) Make sure that the operation steps are easy-to-remember.
- v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.
- vi) Make sure that the AUT does not hang during run time or "strand" the user.
- vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.

viii) Make sure that the AUT does not overload or confuse the users with information that is unformatted, densely packed or presented too briefly.

ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.

x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
