[Detail Run]

S1: Launch, Login And Navigate To Ababil → **Sanction Limit** Module:

Logon to Ababil application. Once the Ababil home page appears, click on the icon of the “**Sanction Limit**” module. From the dropdown of the Sanction Limit main menu, click on the **Product Group**.

V1: Verify that the **Product groups** label appears at the top of the page and a **Create** button is available in the UI.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 01]

S2: Click **Create**

V2: Verify that **Product Group Create** label is showing at the top and a button named **Add** is showing on the top of the **Product List** table.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 02]

S3: **Put** a name and add product.

Click **Add** for grouping product/a list of products to the group.

V3: Verify that a popup window will appear after clicking **Add** where Funded, LC & Bank Guarantee three dropdown fields appear holding a label **Add Product** at the top.

After selecting a/multiple product, verify that all those selected product will appear as **Active** in the product list table.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 03]

S4: **Inactivate** a product from the list and **Submit**.

V4: Verify that a popup will appear holding a label "Confirmation". Click "Yes" to proceed.

Also verify that a pop up appears as "**Product group created successfully**".

Click the recently created product name and verify if the inactive product is showing as inactive.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 04]

S5: Risk and Hazard:

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V5: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise, consistent, complete and unambiguous.

ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.

- iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.
- iv) Make sure that the operation steps are easy-to-remember.
- v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.
- vi) Make sure that the AUT does not hang during run time or "strand" the user.
- vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.
- viii) Make sure that the AUT does not overload or confuse the users with information that is unformatted, densely packed or presented too briefly.
- ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.
- x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
