S<number>: stands for identification of a test procedure step.

V<number>: stands for identification for the corresponding verification(s).

V<number>: N/A stands for verification is not required for this step.

Input/Output Dataset Information:

The input/output datasets referenced in this test case are stored, by the test case name, in [Storage Name], under "[Storage Location Path]".

The tools referenced in this test case are stored, by tool classification, in [Storage Name], under "[Storage Location Path]".

[Detail Run]

S1: Launch, Login And Navigate To Ababil → **Sanction Limit** Module:

Logon to Ababil application. Once the Ababil home page appears, click on the icon of the "**Sanction Limit**" module. From the dropdown of the Sanction Limit main menu, click on the **Sanction Limit.**

V1: Verify that the **Looking for Limit? Search here** label appears at the top of the page and a **Create** button is available in the UI.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 01]

S2: **Search** sanction.

Provide Customer ID for searching the required sanction.

V2: Verify that the required sanction is appearing at the search list.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 02]

S4: Click **view**

Click by providing all data including **Sanction's reference number, Description, Sanction Type : Single Line** & **Sanction Expiry Date** and a customer against whom sanction will be tagged.

V4: Verify that the provided customer name & no. will appear at the top.

Take screenshots of the page and save to the designated storage for record keeping. [Screenshot 04, 05, 06]

S5: Click **Limit Tree Lookup**

Check **Outstanding, Drawing Power, Remaining Drawing Power** from the Limit tree Lookup Basic Information UI.

V5:Verify that the node name, limit amount will appear immediately right to the **Back** button and a tab called "Basic Information" will appear in the UI where **Limit amount, Drawing Power, Outstanding, Remaining Drawing power, Available Limit** balance should be verified.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 07]

Limit Amount - The maximum amount limit that a sanction may hold

Drawing Power - The maximum amount that can be used.

Outstanding Amount - Used amount

Available Limit - (Limit Amount - Outstanding)

Remaining Drawing Power - (Drawing Power - Outstanding)

S6: Check **Utilization Register**

V6: Verify that the Limit Sanction consumer account will appear in the list along with **Utilized Amount** and **Recovered Amount.**

Also verify that the difference between Utilized amount and recovered amount is the Outstanding for the sanction and the difference matches the Outstanding amount.

Outstanding = Utilized amount - Recovered amount

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 08]

S7: Risk and Hazard:

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V7: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise, consistent, complete and unambiguous.

ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.

iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.

iv) Make sure that the operation steps are easy-to-remember.

v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.

vi) Make sure that the AUT does not hang during run time or "strand" the user.

vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.

viii) Make sure that the AUT does not overload or confuse the users with information that is unformatted, densely packed or presented too briefly.

ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.

x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
