Input/Output Dataset Information:

The input/output datasets referenced in this test case are stored, by the test case name, in [Storage Name], under "[Storage Location Path]".

The tools referenced in this test case are stored, by tool classification, in [Storage Name], under "[Storage Location Path]".

[Detail Run]

S1: Go to **Finance -> Financing Product**

V1: Verify that **"Looking for Financing Product? Search here"** appears at the top.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 01]

S2: Disable multi disbursement from the product configuration.

Search product by providing **Code** in the Code filter and **Search.**

V2: Verify that a row appears in the search list where the **Code** column holds the same product code that

is provided for searching.

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 02]

S3: Disallow the multi-disbursement for the product.

Select the product from the search list and click **Edit.**

V3: Verify that same code is appearing in the code field.

Verify that **Multiple disbursement in same account** is allowed. Make the parameter disallowed and **Save.**

A popup will appear for successfully updating the product as "**Financing product updated successfully**"

Take a screenshot of the page and save to the designated storage for record keeping. [Screenshot 03]

S4: Click **Submit**.

V4: Verify that a confirmation pop up will appear as **"Task sent for verification".**

Take a screenshot of the pages and save to the designated storage for record keeping. [Screenshot 04]

Save the Task ID.

S5: Verify and Accept From My Task:

If the product update is sent to verify then login as a verified user and verify the required details. Then click on the accept button.

V5: Verify that the success popup message will be displayed "**Financing product updated successfully**".

Take a screenshot of the pages and save to the designated storage for record keeping. [Screenshot 05]

S6: Risk and Hazard:

Throughout this testing, make sure all labeling, including messages, icons and messages of operation guidelines are accurate, written in short concise sentences, and written in simple and familiar words.

V6: Verify following items wherever appropriate:

Throughout this testing verify the AUT based on the following viewpoints:

i) Make sure that the user interface is simple, easy to understand and screen designs are clear, concise, consistent, complete and unambiguous.

ii) Make sure that the abbreviations, symbols, text and acronyms placed on or displayed by the AUT are consistent and unambiguous.

iii) Make sure that the AUT provides immediate and clear feedback following user entries, whenever necessary.

iv) Make sure that the operation steps are easy-to-remember.

v) Make sure that the prompts, menus, etc. are used to cue the user regarding important steps.

vi) Make sure that the AUT does not hang during run time or "strand" the user.

vii) Make sure that the AUT provides the users useful information in the case of an error. Make sure that the AUT provides conspicuous mechanisms for correction and troubleshooting guidance.

viii) Make sure that the AUT does not overload or confuse the users with information that is unformatted, densely packed or presented too briefly.

ix) Make sure that the use of symbols, icons, colors and abbreviations are acceptable to convey information reliably, precisely and quickly.

x) Make sure that dedicated display mechanisms are used for highly critical and time sensitive information.
